

RPA

Transform Your Business with Robotic Process Automation

What if you could put mundane processes on autopilot?

Gray & Creech

IT SOLUTIONS

Robotic Process Automation Enhances Your Business

Automate your accounts payable department.

Xerox bots can extract information from invoices, process, assign to a cost account, and even pay invoices accordingly, and more.

Keep your supply chain moving.

Time for a product reorder? Your bot will track inventory and place orders for you.

Create sales reports.

No need to spend hours building spreadsheets! Automate reporting, so your sales staff can spend more time selling.

Simplify patient health care claims and billing.

Automate health care patient claims processing by extracting patient data from your health care company portal and processing it based on the patient's location, insurance, service provider, the purpose of visit, and other critical information.

Support your IT helpdesk.

Simplify the management of customer incidents by syncing data between the customer and service provider helpdesk tools, tracking incoming incidents, and routing them to the correct teams.

Develop complete pricing analyses.

Leverage RPA to recommend prices to sales and pricing teams based on historical data and margin analysis.

GCOffice.Solutions

5 Benefits of RPA

Increased efficiency and productivity

Reduced costs

Improved accuracy

Enhanced compliance

More time & resources for strategic work

4 Easy Steps to Supercharge Your Efficiency with RPA

1 Tell us about your needs and we'll evaluate your current processes, big or small, to provide a personalized solution.

2 Our experts select workflows to automate operations based on business value and expected ROI.

3 RPA Bots virtually automate and run your processes.

4 Create a better employee experience by freeing up your staff to focus on higher-value work.
