Want to protect your most vulnerable business assets?

Do you have minimal or no in-house IT resources?

Is your IT expertise limited?

Don't wait for a cyberattack to strike!

You're on top of your business. But when it comes to IT security risks, you don't know what you don't know. Many hazards and security gaps can go undetected — until a problem arises. Don't let this happen to you.

Get peace of mind with an IT Assessment from Gray & Creech.

From Reactive and Vulnerable to Proactive and Protected

An effective IT assessment will evaluate the performance, reliability, and security of your IT assets. Our Gray & Creech IT assessment service will optimize your IT systems to decrease costs, reduce risk, and improve security. So, you can run your business with confidence, knowing you've reduced your susceptibility to a cyberattack and other security issues.

Manage IT Hazards and Security Issues

Protect yourself and your employees — both in-person and remote. A Gray & Creech IT Assessment provides a collaborative approach between your team and our IT risk assessment consultants. Together, we'll take a crucial look at your workforce, corporate strategy, user communication, and both qualitative and quantitative evaluations of IT performance.

Your custom IT vulnerability assessment provides detailed reporting on the following essentials.

- Shortfalls and potential hazards
- Compliance with government regulations
- Compliance with NIST standards
- Detailed reporting on all network endpoints
- Open security gaps
- Power outage mitigation and recovery

Our IT Assessments are comprehensive and guaranteed to strengthen you business, plus we offer additional assessments:

Imaging Assessment

Get a seamless, tailored Managed Print Solutions plan that's specific to your business' evolving needs, both today and tomorrow.

- Production Print Solutions
- Fleet Management
- Multi-Function Printers, Single-Function, Wide-Format, Scanners, Document Management, and more!

Security Assessment

Get armed with a full physical security assessment, so that you can identify vulnerabilities, risks, and potential threats to assets, infrastructure, personnel, customers, or students.

- Security cameras
- Access door controllers
- Environmental sensors
- And more!

6 Steps to Better IT Security

Gray & Creech's Remote Monitoring Management tool (RMM) scans your network for all endpoint devices, including every computer and hardware device on the network. RMM generates detailed reports on your system's age, condition, firmware, data resources, and more. Our IT Team processes your scan into a comprehensive risk assessment, grades it for security, and consults with your team to reach your IT goals.

Step 1: Firewall

This network security system monitors and controls all incoming and outgoing network traffic based on predetermined security rules. Firewalls are your first line of defense from unauthorized access to or from private networks, ensuring the security and integrity of all data transmissions.
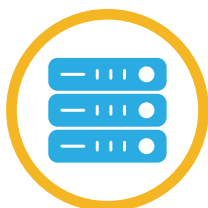

Step 2: Switches

This hardware is responsible for connecting and transmitting data through your LAN (Local Area Network) to the endpoints. Modern technology, like VoIP, video conferencing, and security cameras, requires modern and robust switches to handle increased volume so your network traffic flows fast and flawlessly.

Step 3: Access Points

Today's employees are mobile and shouldn't be tethered to traditional IP ports. Powerful and secure WiFi is essential to conduct business where you need to and when you need to.

Step 4: Servers

Whether you use the cloud or have on premise server, securing your data is paramount. A managed server with automated backups is crucial for protection from equipment failure or a cyber breach.

Step 5: Endpoints

Computers, copiers, printers, and security cameras are a few endpoints that your business carries. RMM keeps them secure and up to date with the latest security patches, firmware, and anti-virus software.

Step 6: Dark Web Scan

Gray & Creech scans the Dark Web for your company's data, employee information from data breaches, or undetected cyber theft.

> Gray & Creech has excellent customer service. I must recognize John Lohr specifically, as he quickly understood our unique challenges and crafted a solution that fit our needs. Everyone in his office has been a pleasure to work with. We look forward to continuing a long-lasting partnership with Gray & Creech.

> Penn Engineering has enjoyed the outstanding, hands-on customer service from Gray & Creech. Our representative, Chris Wilkins, has done a wonderful job with catering to each individual employee's preferences and overall needs. We look forward to a long-term relationship with Gray & Creech!

> 5-Star Service! Working with Gray & Creech has been a smooth and easy process. As a regional manager with HRP residential partners, I have worked with Gray & Creech Office Solutions on two separate transitions since May 2022. The company is helpful and transparent, plus great on set-up and communication. I recommend them!
